

Fairphish

CYBER SECURITY TRAINING AND SIMULATIONS

Free-up valuable time for you and your team with tailored security and phishing protection.

fairtechsolutions.co.uk/fairphish

We take away the worry of preventing phishing within your organisation, with a fully-managed service.

Good cyber security is dependent on people. Staff can alert your technical team to potential problems, like spotting phishing emails or phone calls, but only as long as they know what they are looking for. All the while, they are busy teaching, preparing classes and communication with students and parents.

Fairphish is a cyber security awareness training programme designed specifically for education to help develop a "Human Firewall" within your team.

Working to your term times and holidays, we target training at the moment your staff are most vulnerable, using school terminology and delivered in an easy-to-understand format.

"Cyber security is central to an organisation's health and resilience, which means it's the Board's responsibility."

A Continuous Programme Of Cyber Security Awareness And Phishing Defence For Schools

Programme Engagement: Communication and Staff Baseline	A joint communication to school staff introducing the programme to engender engagement and trust, followed by an initial phishing simulation to baseline staff awareness.	Awareness Program Communication ✓ Initial baseline Phishing simulation ✓ Baseline simulation Report ✓
Phishing Simulations	Realistic, regular, current phishing simulations and reporting designed for education establishment staff.	Education focused Phishing simulations Termly User click notification and advice ✓
Awareness Campaigns	Based on NCSC training for school staff we deliver concise regular cyber awareness modules covering basic security principles.	NCSC based awareness modules Termly School security principles (reminders) ✓
Cyber Safe Tips	Improve personal cyber awareness and behaviour by delivering regular quick tips.	Personal Cyber safe tips monthly Monthly
Reporting & Improvement	We measure engagement performance and improvement with termly reports.	Engagement & Improvement Reports Termly

Why Managed Cyber Awareness Matters To Schools

- Educational organisations rely on their IT systems for teaching and learning and to run operations.
- A recent survey quoted by the NCSC claims 83% of schools had experienced some type of cyber incident or attack and 97% of schools said losing access to IT would cause considerable disruption.
- The first line of defence is network security; technical policies and solutions designed to protect systems and data from cyber attack.
- The second line of defence is awareness. This means ensuring that staff are aware of the risks and know what they should and should not do. We call this “the Human Firewall”.

Talk to us today and discover how Fairphish could help give your school a new line of defense against cyber attacks.
